## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Reitmeier (US6118498, hereinafter Reitmeier).

Regarding claim 1, Reitmeier discloses an electronic device or matrix (switch 40, see Fig. 1) integrated into a reception system (ATSC receiver 100, see Fig. 1) for digital television networks (satellite, ground or cable) (see col 2, lines 58-62 and col 3, lines 34-35) characterized because the MPEG (Motion Picture Expert Group) data flows (see col 2, lines 58-62 and col 4, lines 1-4) are managed by a central processor (CPU 74, see col 2, lines 65-66) and a common interface controller (controller 70, see col 2, lines 64-65) so that the data from various sources (MPEG data transport streams) (see col 4, lines 1-10) can be routed intelligently and indistinctly to one or more reception devices (see Fig. 1), with said data flow being redirected through common interface modules that may act as filters, transformers or regenerators of the data (see Fig. 1).
